RODIM Fleece Roll

SANDING

Handling

The RODIM Fleece Roll is ideal for both wet and dry sanding applications.

Flexibility

Due to the three-dimensional special structure and the high flexibility, the RODIM Fleece Roll is easy to use on contoured surfaces and profiles. The high flexibility of the RODIM Fleece Roll makes it ideal for the hand-sanding of painted surfaces and irregular, difficult-to-reach details.

Aggressiveness

The aggressiveness is very good on all materials. This ensures, that the painter can work with little pressure to get a better refinish.

Refinishing

The Fleece Roll perfectly supports the process of matting surfaces and creates an excellent base for the next lacquer layer.
