MIXING AND PAINTING

Usage:

The especially designed RODIM MPS-2 dispenser for lids has a transparent front hatch, keeping the lids free from dust and easy to handle.

The RODIM dispensers for liners are easy to use. They have an opening in the front for visible stock control.

In addition, the dispenser for 650ml and 850ml liners are designed for both sizes, simply change the dispensing aid at the bottom for the desired size.

Features and Benefits:

- Made of cardboard - environmentally friendly
- Easy installation
- Cleaner working environment
- Dust free storage
- Easy to refill
- Easy to dispense

Dispensers for MPS-2

MIXING AND PAINTING

Lid Dispenser Full Size - Universal

Easy to store

Safe from dust

Easy to use

Recyclable

Installation

1. Prepare accessories for assembly.

2. Fold box correctly to enable magnetic system to connect sections together.

3. Install supplied reinforcement plate via top opening of box. Ensure plate is finally located at very bottom of box.

4. For dispenser door installation, insert one plastic hinge into pre-cut slot on front of box. Fix in place with rubber ring, installing on inside.

5. Insert end of door through first hinge. Place final hinge on other end of door and pass through pre-cut slot. Hold in place with final rubber ring.

6. Prepare the wall for dispenser box installation.

7. Affix the box to wall using the supplied fixing kit.

8. Fill dispenser with lids, using upper loading hatch. Lids can then easily be dispensed through front hatch, as and when required.
