RODIM MPS-2

MIXING & PAINTING

Preparation

Install RODIM spray gun adapter - manufacturer specific

Prepare all parts of the cup (Lid, Liner, Outer Cup and Collar).

Place the liner in the outer cup

Mixing

Prepare required paint material as per manufacturer recommendations

Install lid and tighten collar to lock cup system together

Painting

Connect the spray gun to the MPS-2 cup and lock in position

Attach air line to spray gun and pull trigger to expel excess air from the cup

Carry out the paint application. Inverted application is also possible!

End

Disconnect airline. Invert spray gun and pull trigger to allow any paint to return to the MPS-2 cup. Twist off the spray gun from the MPS-2 system.

Unlock the MPS-2 system, take out the lid together with the liner and dispose according to applicable regulations.

If required, store any left over paint according to TDS. Change lid before reusing.
