Application

Machine and manual, dry and wet sanding of metal, plastic, polyester body filler, filler, clear coat, paints in general, resins, wood

Mineral

P80 – P1000: aluminum oxide

Resin

P80 - P800: Double resin coated

P1000: resin over resin

Stearate

P80 - P180: calcium stearate

P220 – P1000: zinc stearate

Backing

P80 – P1000: paper

Compatible with:

Article Number	Article description
45225053	ROD-401401 Back-Up Pad 150mm Medium
45225054	ROD-401402 Back-Up Pad 150mm Soft
45225055	ROD-401403 Interface Pad 150mm 5mm (5)
45225093	ROD-401404 Interface Pad 150mm 10mm (5)

Packing:

1 Piece = 1 Pack consisting of 100 Discs for Grit P80 to P1000

RODIM Sanding Disc 150mm

SANDING

P80 – P800:

- RODIM Sanding Disc range is an all-round product to be used as well on lacquers and paints as on wood and fillers.
- The tough, latex coated base paper makes RODIM Sanding Disc a balanced, flexible product with good aggressivity and good durability.
- The full resin bonding and the even, semi-open special treated aluminium oxide grain coating provide a constant stock removal resulting in an excellent surface finish.
- The special surface structure with Zn-stearate coating on P220 and finer and Ca- stearate coating on P180 and coarser guarantees good clogging resistance also when sanding materials with higher clogging tendency.

P1000:

- RODIM Sanding Disc range is an abrasive product for dry sanding applications with a high-performance non-loading stearate. The full resin bonding and the latex paper make the product ideal also for wet sanding applications. Because of the well-balanced flexibility it is easy to level orange peel, dust inclusions and other paint defects.
